THE MONOCOLOUR

A decor trend that keeps being strong!

Using a single colour is a very effective way to delimit and define a space. Both in architecture and interior design, using monocolours is a way of giving importance to different spaces.

Something very characteristic of using monochrome decorations is that the lights and shadows are projected with different nuances and tones, therefore enhancing the base color. In addition to that, by using them on different areas, such as floors, walls and facades, they create different atmospheres where it seems that there are gradients or shades. Because of it, the lighting used in these spaces is very important.

The CROMA collection is a ceramic color concept in a matt finish without reflection, that goes from the classic black and white to various pastel colours. Today's avant-garde projects demand high performance characteristics such as those offered by this collection:

- Porcelain tile suitable for interior and exterior applications (facades).
- Porcelain tile suitable for water areas such as swimming pools, showers, etc.
- Matte texture developed for the requirements of international projects (Class 1 CTE, Class R10 DIN, DCOF > 0.42).

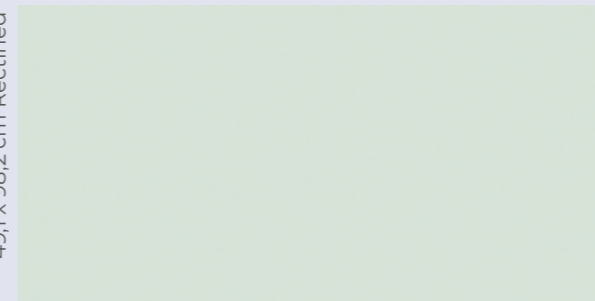

In short, with this collection, and range of colors, we once again see the quality and ceramic experience of CERACASA.
